

Learning Support - Information Report

Based in a specially designed student support area (the HUB), the Learning Support team supports students with a variety of barriers to learning. The team consists of the Learning Support Team led by the school's Special Educational Needs Co-ordinator (SENCO) and experts in relation to learning mentoring.

Support in lessons and in small withdrawal groups is provided when needed for those students with a Statement of Special Educational Needs/Education, Health & Care Plan or those having particular learning difficulties. Mainstream lessons are differentiated to meet the needs of students so that all High Storrs students can engage with the curriculum.

The team calls upon the expertise of outside agencies when required both from academic and pastoral points of view. We work closely with classroom teachers to ensure that each student's experience of school is a positive and productive one. Our aim is for each student to be able to be equipped with the skills and knowledge in order that they can fulfil their potential. Our holistic approach works in that we work as a team to meet the needs of the individual student.

The Learning Support team meet the needs of students across all transition stages with the aim of making the experience as enjoyable and rewarding as possible.

The full SEND policy can be found attached.
